

Occupational Risk Prevention Policy

Saba Infraestructuras, hereinafter Saba, conceives **the prevention of occupational risks** as a commitment to comply in all its actions based on the fundamental principle of protecting the integrity and health of workers, as well as that of its customers. This business commitment makes the prevention of occupational risks one of **the company's strategic and priority objectives**. Saba is committed to providing **safe and healthy working conditions** for the prevention of injuries and health deterioration related to the development of its activity as manager of car parks and regulated areas on public roads.

Saba's actions are not based simply **on complying** health and safety regulations, but on exceeding the minimum legal operations to achieve **maximum efficiency** through our continuous process of improving health and safety conditions in workplace. To this end, Saba periodically reviews and adopts any necessary measures and promotes **advance assessment of potential impacts** on the health and safety of people working in our facilities, be they our own staff or contractors from outside Saba.

For the continuous improvement of the safety and health management system, Saba annually sets the health and safety **objectives** through the **evaluation framework** established for Senior Management and middle management. These are aligned with the performance of occupational risk prevention indicators. In addition, Saba proactively promotes **consultation and participation** of workers and their representatives, especially in health and safety at work, maintaining various communication channels open to all stakeholders: employees/employees and subcontractors.

Everyone working at Saba receives suitable training and information adapted to the work they do, so that they can fulfil their duties while avoiding unnecessary risks and making a positive contribution to risk prevention, encouraging the effective involvement and participation of everyone.

The Management at Saba undertakes to review this policy periodically, adapting it to any needs that may arise. It shall be accessible to anyone interested and will be distributed among all its employees and contractors, as well as being made available to our clients and the rest of the Society.
